PERSONAL PROJECTS

Vaccination Bot

- I developed this bot look for vaccine availability in nearby locations and alert a person on telegram app as soon as vaccine was available in his/her location.
- Bot developed to help frontline workers as vaccination was compulsory for their regular operation.
- The project was built using python and telegram API.

Movie ticket booking system

- This digital solution caters the ticket booking services to consumers and theatre management capabilities to theatre owners.
- This project was coupled with real time payments system powered by Instamojo payment API's to facilitate payment for ticket booking and refunds on cancellation of ticket.
- The project was built using php, mysql, html, css and bootstrap.

Courier management system

- The project was built to support small scale courier business vendors to have an digital solution to manage their business and gain vital insights about business operations.
- This digital solution enabled end to end courier services through internet without any paperwork or requiring to visit nearby courier service for information and also provided features like live tracking of courier.
- The project was built using php, mysql, html, css , ionic and bootstrap.

ACHIEVEMENTS

Microsoft Technology Associate (Python) (2020)

Microsoft Technology Associate (Javascript) (2019)

BrainTech Championship (Zonal Winner Bangalore) (2018)
